

Artist Statement – Debra Michelle

As an artist, published author, and seasoned healing arts master practitioner, I've been channeling creativity and the universal soul through the artistic mediums of digital artistry, poetry, literature, jewelry crafting, and through my work as a healing arts practitioner for over 20 years.

My fascination with stones and jewelry crafting was inspired by my father who had an uncanny ability to create beautiful landscape pieces from the simplicity of nature. In a raw eclectic way, he created beautiful pictures within the landscape that told a story and inspired one's imagination. It taught me to trust in the sentience of nature to inspire the way in which each piece of jewelry births its own beauty and elegance based on nature's ability to tap into the soul of its intended recipient. I've found this to be incredibly captivating and awe inspiring about the process of jewelry making.

As Founder and Owner of Soulistic Twist Hand Crafted Metaphysical Jewelry & Cultural Adornments, I welcome you to a platform that offers the highest quality and styles of handmade gemstone jewelry. I design personalized wearable spiritual and cultural art pieces with the metaphysical properties of natural gemstones and the conductive properties of various metals in mind. Each piece I create is preceded by intentions of healing and empowerment followed with focused meditation throughout its process. Once completed each piece is vibrationally calibrated and recharged in sunlight and moonlight, cleansed with Palo Santo wood and infused with healing intentions using Reiki.

Wire wrapping has inspired me to trust in the sentience of nature to work within the craftsman to bring out its own healing properties and inherent beauty based on the energetic blueprint of its wearer. I hope that my artistry speaks to you in ways inciting divine thought, personal empowerment, ancestral and cultural pride and healing inspiration.
